nominal cover [sq.km]

2,010,800

**Notes:**

- \*1 For definitions and measurement units see general notes on paramount peaks
- \*2 Bartle Frere and Bellenden Ker are near each other and thus the eminence of Bellenden Ker depends critically on the exact position of the peaks. Both mountains have multiple peaks. In the case of Bartle Frere there is a fair agreement that the South Peak is the higher, but Bellenden Ker has confusing data. Some sources (e.g. Peakware) give the position of the South Peak, others the more likely Centre Peak. A rather strange error in Peakery places Bellenden Ker in the ACT and gives entirely false heights e.g. 441 m for the North Peak (out by more than 1000 m).
